 Heather Holmes, MLIS, AHIP | Associate Director of Libraries | Medical University of South Carolina
 Elizabeth Laera, MLIS, AHIP | Medical Librarian | McMahon-Sibley Medical Library | Brookwood Baptist Health
 Created By: Shafer G. Tharrington | Medical Library Research Associate | Robert B. Greenblatt, M.D. Library | Augusta University

Professional Competency Areas

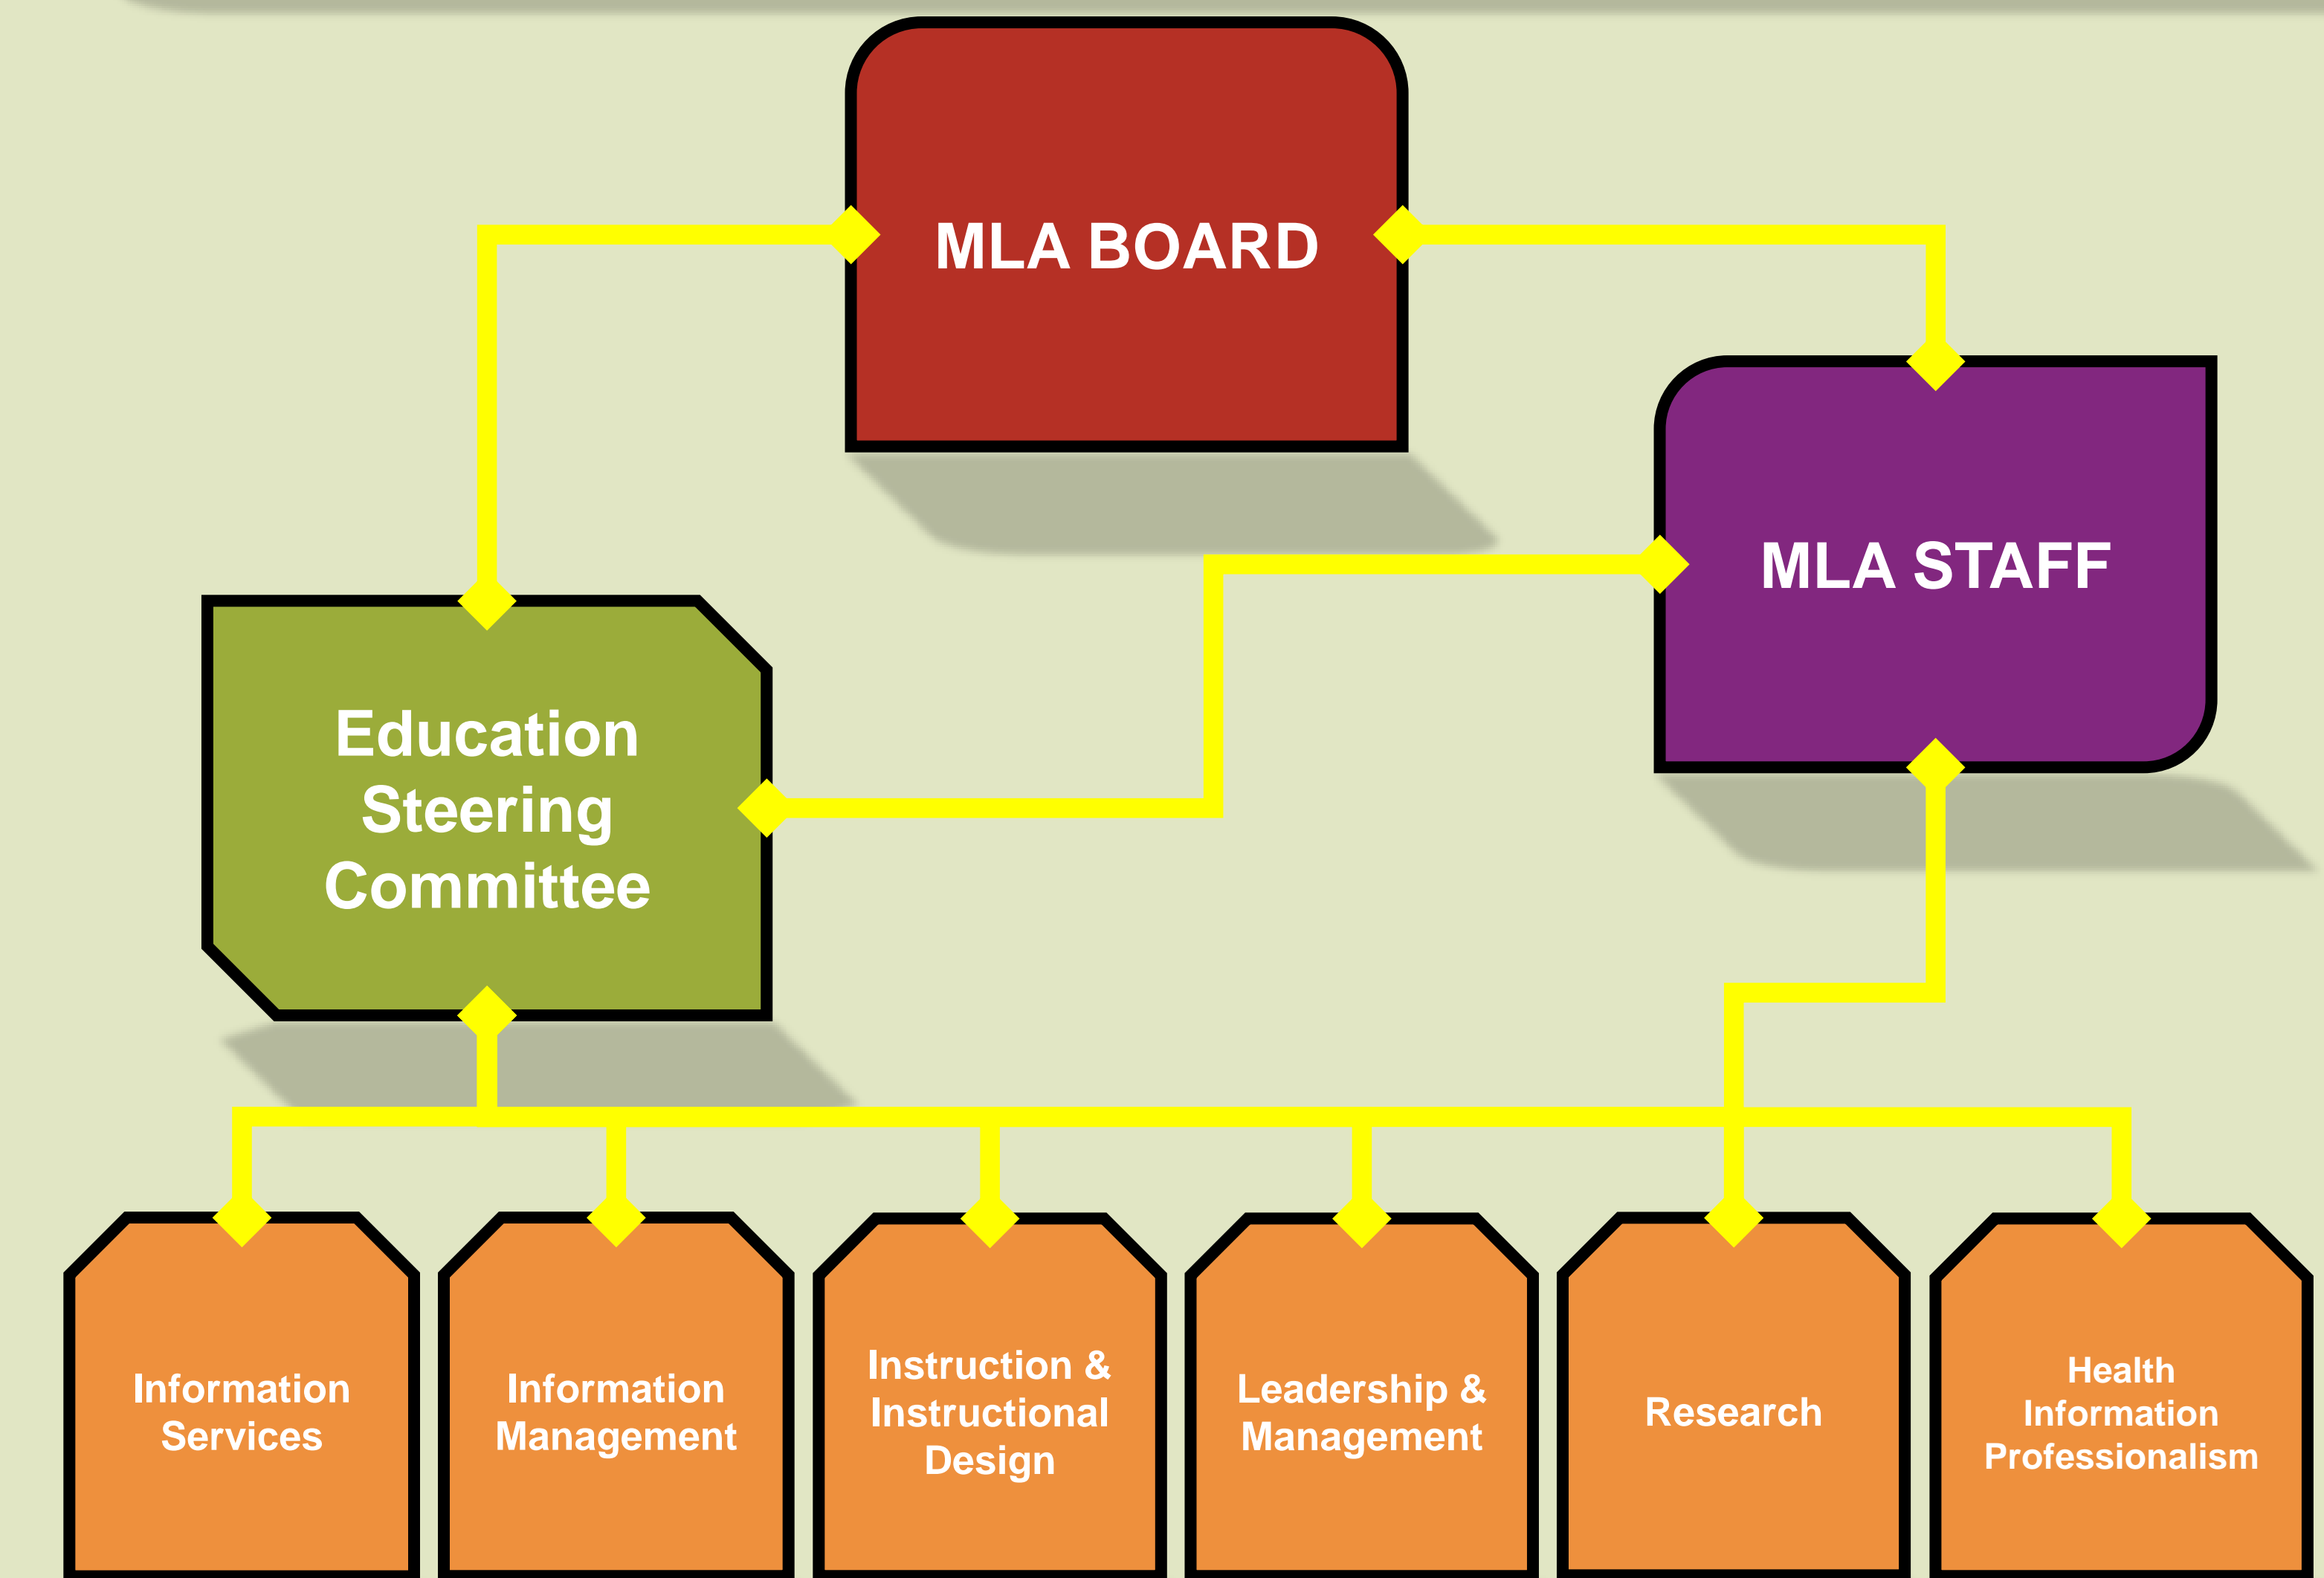

MLA appointed the Education Steering Committee and six Education Curriculum Committees to develop education content based on the Association's revised Professional Competencies. The Competencies provide the framework that define the skills to be gained as a result of educational offerings. The Education Curriculum Committees are charged with:

1. Designing and planning curriculum and educational offerings and resources.
2. Providing direction, expertise, and knowledge to creators and instructors of educational offerings with respect to content and instructional design.
3. Reviewing and assessing offerings to ensure they are high quality and current, meet learning outcomes, and have a succession plan.

The work of the Curriculum Committees is shaped by the curriculum priorities document set forth by the Education Steering Committee, beginning with a "Bootcamp" that incorporates foundational offerings across the Competencies.

Education Structure at the Medical Library Association

Online Self-Paced Courses In Development

- Assessing Information Needs
- Crucial Conversations
