Re: 16-05012-NHSR

Study Title: Psychometric Evaluation of the Nursing Child Assessment Teaching (NCAT) Scale in Two Samples of Mothers and Children

Dear Ms. Ransone:

The Administrative Section of the UTHSC Institutional Review Board (IRB) reviewed your application for the above referenced project. The IRB determined that your application qualifies for **NHSR (not human subjects research) status** in that it does not involve “human subjects” as defined in 45 CFR 46.102(f).

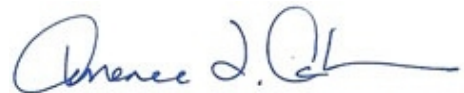

No further interaction with the IRB is necessary if the project is conducted as currently described. However, any revision of these activities should be submitted for IRB review to determine whether the project still qualifies for NHSR status.

Sincerely,

Signature applied by Donna L Stallings on 12/05/2016 01:48:27 PM CST

Donna Stallings, CIM
IRB Administrator
